

Synoptic situation

A low-pressure system north of Italy is causing moist southwesterly air to flow into the Aosta Valley, bringing unstable conditions between today and tomorrow, with weather phenomena that may be intense in some areas. Starting Saturday, the upper-level flow will be influenced by a high-pressure system of African origin, bringing a gradual increase in stability and sunny days.

Warnings

Forecast

Mid-to-high clouds passing through and a gradual build-up of cumulus clouds, especially over the mountains, with skies ranging from partly cloudy to cloudy in the afternoon and locally very cloudy overnight. In the afternoon, scattered showers or local thunderstorms—moderate only in some areas—are possible everywhere. Starting in the evening, moderate or locally heavy showers and/or thunderstorms are expected, most likely in the northern region but not ruled out elsewhere; conditions will temporarily ease around the middle of the night.

Winds

3,000 m W-NW winds ranging from moderate to strong, shifting to SW by late morning and intensifying, especially in the evening; in the central-western valleys, light winds from the W-NW in the morning, moderate with locally strong gusts in the afternoon; in the eastern valleys, light winds from the W-NW until mid-morning, then shifting to the E-SE and intensifying to moderate in the afternoon with local gusts.

Temperatures

Lows are falling significantly, while highs are rising.

Reliability ●●○○○

Night - from 00 to 06

Morning - from 06 to 12

Forecast

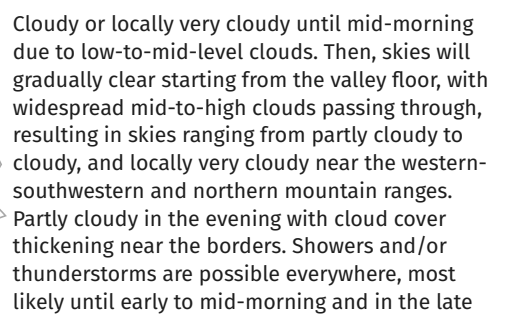

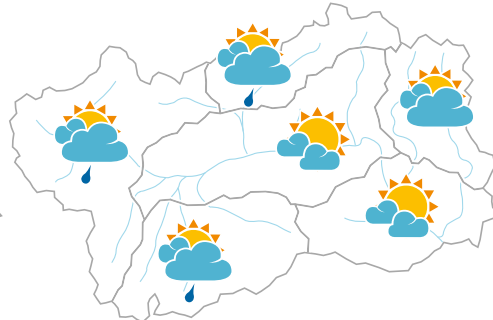

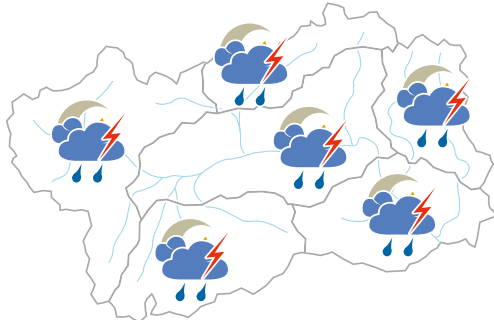

Cloudy or locally very cloudy until mid-morning due to low-to-mid-level clouds. Then, skies will gradually clear starting from the valley floor, with widespread mid-to-high clouds passing through, resulting in skies ranging from partly cloudy to cloudy, and locally very cloudy near the western-southwestern and northern mountain ranges. Partly cloudy in the evening with cloud cover thickening near the borders. Showers and/or thunderstorms are possible everywhere, most likely until early to mid-morning and in the late afternoon and evening, particularly over the northern and west-northwestern mountain ranges.

Winds

3,000 m from the SW, moderate to strong until midday, then partially shifting to the W with local intensification, and from the NW in the evening; in the central-western valleys, light winds from the W-NW in the morning, moderate in the afternoon; in the eastern valleys, light winds from the W-NW, then light winds from the E-SE, moderate in the afternoon.

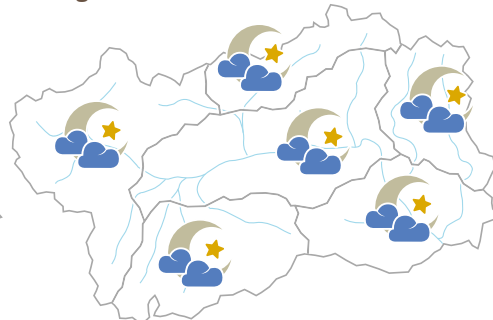

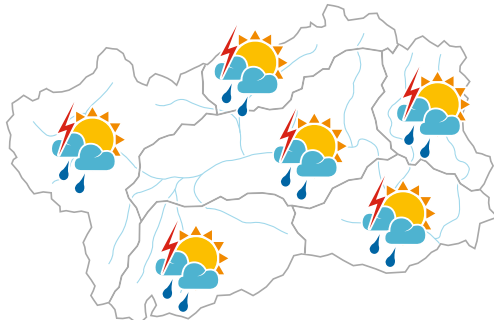

Temperatures

down significantly.

Warnings

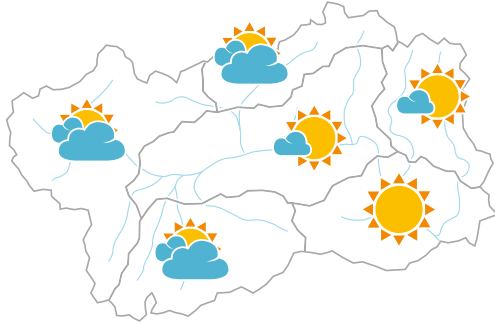

Saturday 18 July 2026

Reliability ●●●○○○

Morning - from 00 to 12

Forecast

Cloudy or locally very cloudy over the border mountains, especially in the west-southwest and north, throughout the day, with a chance of a few isolated showers in the late afternoon and evening. Elsewhere, partly cloudy in the morning, with cumulus clouds gradually developing from mid-morning onward, leading to partly or patchy cloud cover, especially in the west and near the mountains.

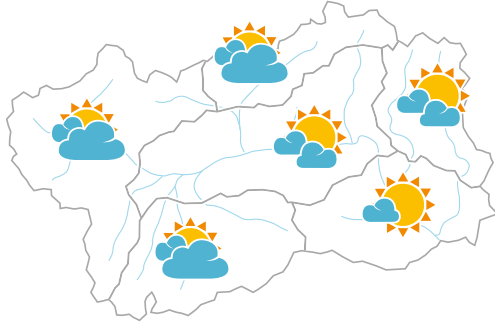

Winds

3,000 m from the northwest, initially moderate to strong, gradually weakening; in the valleys from the west-northwest, light in the morning, moderate or locally strong in the afternoon.

Temperatures

In the mountains, temperatures are falling, with a noticeable drop in the high mountains; in the valleys, lows are steady and highs are falling slightly, except in the eastern sector.

Sunday 19 July 2026

Reliability ●●●○○○

Morning - from 00 to 12

Forecast

Mostly clear skies until early morning, with a few clouds over the border mountains. Cloud cover will gradually increase, becoming partly cloudy over the mountains in the early afternoon; skies will be mostly clear or partly cloudy elsewhere. Skies will gradually clear by the end of the day.

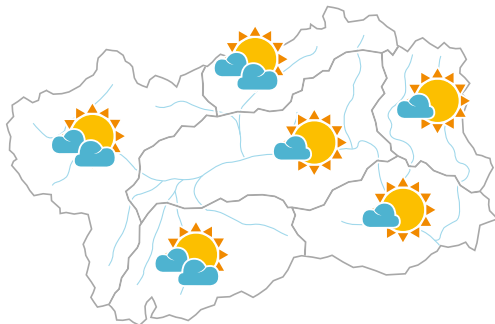

Winds

3,000 m Moderate or locally strong winds from the northwest, shifting locally to the west in the afternoon; in the central-western valleys, weak winds from the west-northwest in the morning and moderate or locally strong in the afternoon; breezes in the eastern valleys, moderate in the afternoon.

Temperatures

Temperatures will remain nearly unchanged in the mountains and will drop slightly in the valleys, especially the lows.
